

## **Porcelain Veneers**

### ***After Treatment***

Please avoid chewing excessively hard foods on the veneered teeth (such as hard candy, ice, and raw carrots) as this may chip the porcelain.

If you've been fitted with your temporary and not your final veneer, please avoid sticky foods. Also be careful when flossing not to pop off the temporary.

Don't worry about mild sensitivity to hot or cold foods. It will disappear gradually over a few weeks. Please call us if the sensitivity does not disappear.

If your bite does not feel right, if you notice sensitivity to pressure or temperature that lasts for several weeks, please contact us.

Maintain your regular preventative care. It's critical for keeping your veneers healthy.
